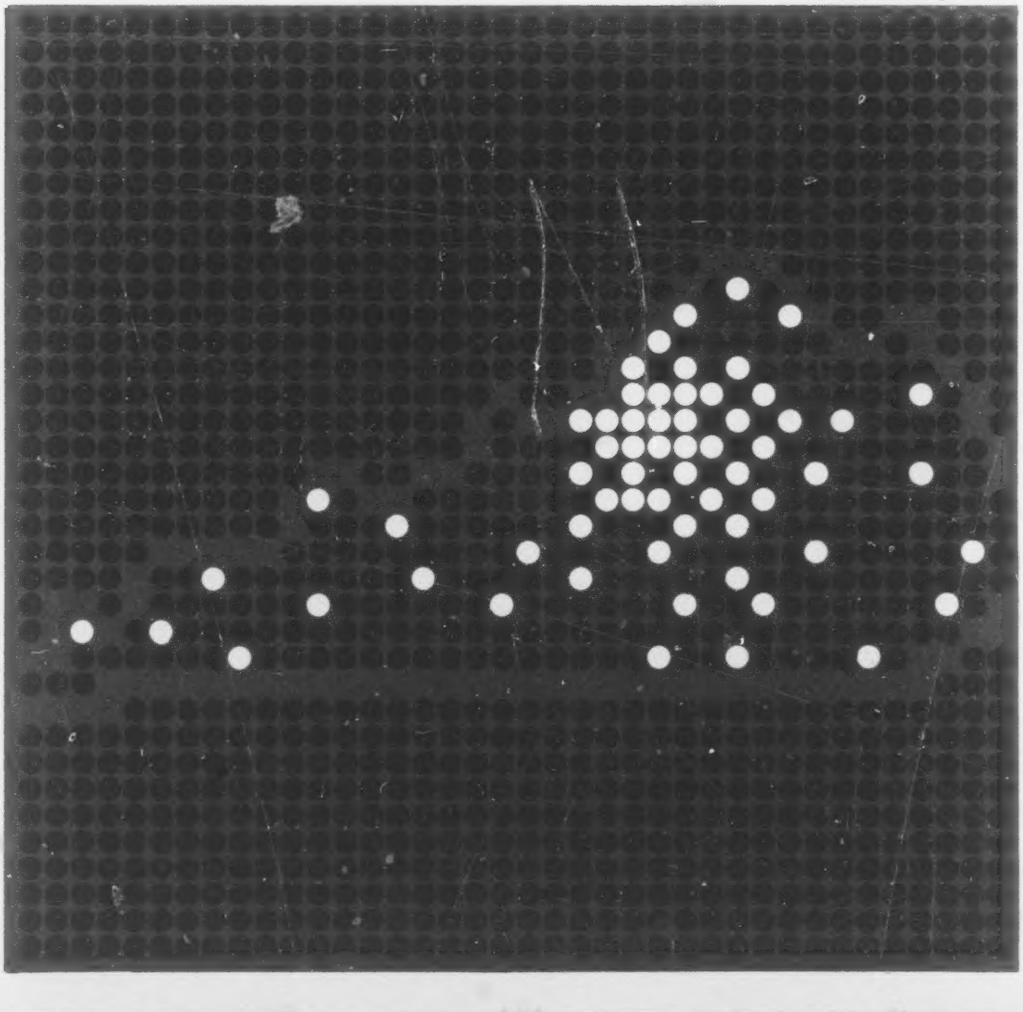
The 1980 Census of Kentucky

Vol. II: Detailed Social, Economic Characteristics

The State and Counties

A Special Report of the **Urban Studies Center**
University of Louisville
Population Research Unit

November, 1982



Acknowledgements

The comprehensive population research program, of which this report is a product, has been made possible to a great extent by the Commonwealth of Kentucky, which has designated the Urban Studies Center as the Commonwealth's primary source of population information and research and also operator of the State Data Center of Kentucky. The University of Louisville and its Urban Studies Center appreciate the confidence represented by this support.

This report and the others listed below constitute the first public release of details from the 1980 Census of Kentucky. The data were supplied in machine readable form by the United States Bureau of the Census and its Data User Services Division for dissemination through the State Data Center.

The Urban Studies Center and the University of Louisville gratefully acknowledge the network of support that makes these services possible, including especially that from the State Office for Policy and Management, the Kentucky General Assembly, and the Bureau of the Census.

The 1980 Census of Kentucky

This report is one in a series of three that detail results of the 1980 Census of Kentucky at the state and county levels. Additional copies of this report and the other two in the series are available at cost at the Urban Studies Center. The prices indicated include the cost of postage and handling:

Vol. I.:	The 1980 Census of Kentucky General Population, Household and Housing Characteristics (From the 100 Percent Count)	$ 7.00
	NOTE: This report appeared originally as seventh in the Urban Studies Center's Kentucky Demographics Series, dated January 1982.	
Vol. II:	The 1980 Census of Kentucky Detailed Social and Economic Characteristics (From the Sample Count)	$10.00
Vol. III:	The 1980 Census of Kentucky Detailed Housing Characteristics (From the Sample Count)	$10.00
Special:	All 3 Volumes (I, II, III) The 1980 Census of Kentucky	$22.00

All orders must be prepaid. Make checks payable to the Urban Studies Center. Write or call:

APPENDIX: Definitions and Explanations of Area Classifications and Subject Characteristics 257

Introduction

This report presents detailed data from the 1980 Census of Population and Housing on social and economic characteristics for the residents of Kentucky and its 120 counties. Covering a wide range of subjects, these data comprise the most comprehensive information available on Kentucky's population. Accurate information in this scope and detail only can be obtained through an undertaking as extensive as a decennial census. Subject areas include: general population characteristics; family and household composition; fertility; occupation, industry, and other labor force characteristics; commuting and transportation; veteran and disability status; income and poverty status; and educational characteristics.

The 1980 census was conducted primarily through self-enumeration, with the principal determinant for responses being, therefore, the questionnaire and its accompanying instruction guide. The data presented herein were obtained from the "long-form" questionnaire, which canvassed approximately 20 percent of the households throughout the state. The sample figures were inflated by a weighting technique to the 100-percent population control totals. Hence, certain census figures in this report, e.g., age breakdowns, may differ from the 100-percent figures due to the weighting procedure. The 100-percent census data for Kentucky are available in *The 1980 Census of Kentucky: General Population, Households, and Housing Characteristics*, Volume 1.

The content and procedures of the 1980 census were determined after evaluation of the results from the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to an appreciable extent the comparability between 1980 census data and 1970 census data for most characteristics. Definitions and explanations of 1980 area classifications and subject characteristics are provided in the appendix of this report. For further information on the comparability of 1970 and 1980 census data, contact the Population Research Unit of the Urban Studies Center.

KENTUCKY COMPARISONS

This section of the report presents four statistical comparisons for Kentucky and its 120 counties. The comparisons focus on income, poverty, education, and labor force. For each subject area, a table comparing the state and counties on key data items is presented along with written highlights.

The distribution of household income, median income for households and families, and money per capita income as of 1979 are presented and compared on pages 4 and 5. On pages 6 and 7, the percentage of individuals and families with income below poverty level in 1979 are shown for the total, white, and black populations, for persons 65 years old and over, and for total and female headed families. Educational enrollment and attainment figures are on pages 8 and 9. And finally, on pages 10 and 11, statistics on labor force status, occupation, and class of worker are presented.

INCOME

- Kentucky's median family income more than doubled over the last decade, increasing from $7,441 in 1969 to $16,444 in 1979. After adjusting for the national inflation rate, however, the state's real growth in median family income was 11.6 percent. The U.S. median family income rose from $9,590 to $19,908, representing a real growth of 4.8 percent.

- In seven counties, growth in median family income did not keep pace with the national inflation rate, resulting in a decline in real income. These counties were Breckinridge (-1.0%), Casey (-2.3%), Green (-0.1%), Lewis (-0.5%), Meade (-1.8%), Montgomery (-0.2%), and Nicholas (-1.3%).

- Throughout the Commonwealth, there are major geographical disparities in income. The 1979 median household income ranged from $21,243 for Oldham County to $6,673 for Owsley County. Seven counties, all located in metropolitan areas, had higher median household income than that of the nation. All metropolitan counties had a median of $16,589, compared to $12,191 for non-metropolitan counties.

- The state's 1979 money per capita income was $5,978, compared to $7,313 for the U.S. as a whole. Only Fayette and Jefferson Counties had money per capita incomes higher than the national figure. Owsley County ($2,946) was the state's lowest.

- Although income for blacks rose at a higher rate than white incomes, there are still wide racial disparities in income. The mean family income for blacks rose from $6,128 in 1969 to $13,917 in 1979, an increase of 127.1 percent. White mean family income increased 123.9 percent, from $8,716 to $19,519.

- Household incomes varied considerably by income type. In 1979 the state's households with wage and salary sources of income had a mean income of $17,024; those with social security income -- $3,765; and those on public assistance -- $2,038. Households with nonfarm self-employed incomes averaged $11,780, compared to $3,753 for those with farm self-employed incomes.

POVERTY

- Kentucky's population living in poverty decreased by 92,073 persons, or 12.8 percent, from 1969 to 1979. Persons below the poverty level comprised 17.6 percent of the state's population in 1979, compared to 22.9 percent ten years earlier. However, despite these gains, nearly 25 percent of Kentucky's elderly and one third of the state's black population were still living in poverty in 1979.

- The number of families with income below the poverty level fell 9.5 percent over the deacde, from 158,779 to 143,667. In 1969, 19.3 percent of all families in the state were in poverty; in 1979, this figure was 14.6 percent. For the U.S., families in poverty decreased from 10.7 to 9.6 percent.

- In 1969 persons below the poverty level comprised 50.7 percent of blacks and 32.6 percent for whites. By 1979 these figures declined to 33.0 percent and 16.4 percent for blacks and whites, respectively.

- Elderly are more likely than the general population to be in poverty. While 17.6 percent of all persons were below poverty level, 23.3 percent of persons 65 years and over were in poverty. Moreover, 40.7 percent of all elderly unrelated individuals had poverty level incomes. However, the state's elderly made the most significant improvement in terms of poverty status. Although the number of persons 65 years old and over increased by over 20 percent over the decade, those below poverty level declined by 30.1 percent. In 1969 nearly 40 percent of all elderly lived in poverty.

- Owsley County was proportionately the poorest in the state with 48.3 percent of its population below the poverty level, followed by Clay County with 42.4 percent. Nine counties had at least 35 percent of their population in poverty.

- Six counties had less than 10 percent of their populations below the poverty level. Oldham County (6.5 percent) and Boone County (6.8 percent) had proportionately the least poor people in the state.

- Families headed by a female with no husband present are most likely to live in poverty. Thirty-five percent of these family types had incomes below poverty level in 1979. Moreover, the presence of children compounds the situation. Of all families headed by women without a husband and with preschool age children, 55.8 percent were below poverty level.

- The Census Bureau classified families and unrelated individuals as being below the poverty level based on 1979 income cutoffs or "poverty thresholds." The income cutoffs vary according to size of family, number of children, and age of the family householder or unrelated individual, and are updated each year to reflect the change in the Consumer Price Index. The 1979 poverty threshold was $7,412 for a family of four, $3,774 for a single person under 65 years, and $3,479 for a single persons 65 years and over. Inmates in institutions, Armed Forces personnel in barracks, college students in dormitories, and unrelated individuals under 15 years are excluded from the poverty universe.

EDUCATION

- The educational attainment of Kentuckians has improved significantly. For persons aged 25 years and over, those graduating high school comprised 53.1 percent in 1980, compared to 35.6 percent in 1970. In spite of this improvement, however, Kentucky ranks last among the 50 states for this measure of educational achievement. For the U.S. as a whole, approximately two thirds of all persons aged at least 25 years had graduated high school.

- The educational gap between whites and blacks decreased over the last decade. In 1970 the proportions of the white and black populations aged 25 years and over completing 4 years of high school were 39.2 and 29.2 percent, respectively. By 1980 these figures had risen to 53.3 percent for whites and 49.7 percent for blacks. Less significant gains were made in higher education, however. Those completing 4 or more years of college rose from 7.5 to 11.3 percent for whites and from 3.3 to 6.5 percent for blacks.

- High school graduates, as a proportion of the population 25 years old and over, were highest in Fayette County (71.6 %) and lowest in Jackson County (25.3%). Seven counties (Clay, Cumberland, Jackson, McCreary, Owsley, Wayne, Wolfe) had less than 30 percent high school graduates.

- The 1980 census enumerated 653,784 persons, or nearly one third of the state's population at least 25 years old, who had an eighth grade education or less. In Jackson County and Cumberland County, this group comprised over 60 percent.

- In the Spring of 1980, 147,679 persons, or 4.0 percent of the state's population, were enrolled in college. In nonmetropolitan counties where major state universities are located, however, college students comprise large portions of the local population. This is the case in Calloway County, location of Murray State University (17.0%); in Rowan County location of Morehead State University (20.7%); in Madison County, location of Eastern Kentucky University (20.3%); and in Warren County, location of Western Kentucky University (13.6%).

- From 1970 to 1980 the state's college enrollments increased by over 63,000 or nearly 76 percent. Elementary school enrollment, however, droped by 3.2 percent, reflecting the decline in birth rates since the mid-sixties. High school enrollment increased by 7.0 percent, but is expected to decline based on the current age structure.

- Persons at least 25 years old with four or more years of college experience comprised 11.1 percent statewide in 1980, up from 7.2 percent in 1970. In the seventeen metropolitan counties, this 1980 figure was 14.7 percent; and in nonmetropolitan counties, it was 8.2 percent. Fayette County, with 25.6 percent, was the highest in the state.

LABOR FORCE

- The state's labor force grew faster than the working age population. 57.2 percent of persons 16 years and over were in the labor force in 1980, an increase of 4.2 percent from 1970. Nationally, the labor force comprised 62.0 percent of the working age population in 1980.

- Female labor force participation is increasing. In 1980 women comprised 39.8 percent of the state's labor force, up from 35.0 percent in 1970. Labor force participation rates increased more for women than men, with the highest increases experienced by women with own children.

- Throughout the state, only 4.4 percent of the labor force are employed in the traditional rural occupations of farming, fishing, and forestry. However, in the counties of Fleming, Green, Hart, Metcalfe, Robertson, and Spencer, over one fifth of the resident workers are employed in these rural occupations.

- The location of major military installations, Fort Campbell and Fort Knox, contribute to Christian and Hardin Counties having among the highest labor force participation rates in the state (66.1 and 70.1 percents, respectively). Franklin County, home of the state capital, was also among the leaders, with a labor force participation rate of 68.2 percent. Not surprisingly, the number of government workers was proportionately highest in Franklin County, with 46.9 percent of the resident work force employed on all levels of government. Moreover, Franklin County had the highest proportion of workers in the white collar jobs of technical, sales, and administrative support occupations.

	Labor Force Status (Persons 16 Yrs. & Over)			Occupation (Percent of Employed Persons 16 Years and Over)						Class of Worker (Percent of Employed Persons 16 Years and Over)			
	In Labor Force	Not In Labor Force	Percent In Labor Force	Managerial & Professional	Tech., Sales, Admin. Support	Service	Farm, Fish, Forestry	Precision Prod., Craft & Repair	Operators, Fabricators, & Laborers	Private Wage & Salary	Government	Self-Employed	Unpaid Family

KENTON	62208	38505	61.7	19.8	34.3	13.0	.6	12.9	19.1	82.7	12.0	4.9	.3

- In 1980 white collar jobs in the technical, sales, and administrative support occupations were the most numerous in the state, comprising 26.7 percent of all occupation. Blue collar jobs in the operators, fabricators, and laborers group numbered the second highest, comprising 23.1 percent.

- The health services industry experienced the highest rate of employment growth of all industries in the state. Professional and related services industries which include the health industry gained over 85,000 workers over the decade, the largest increase for any industry. Manufacturing industries increased overall employment, but nondurable manufacturing jobs declined by 13.9 percent. Although manufacturing is the highest employing industry in the state, its share of all workers dropped from 25.6 percent in 1970 to 22.5 percent in 1980.

- Although Kentucky's number of federal government workers fell by 1.2 percent, state government and local government workers rose by 57.9 percent and 45.4 percent, respectively. Government workers at all levels made up 16.7 percent of the state's work force. The self-employed in Kentucky also fell by 4.9 percent over the last decade. Private wage and salary workers comprised nearly three quarters of the employed labor force in 1980, increasing their numbers by 229,459 over the decade.

- Unemployment is increasingly higher for blacks than whites. The unemployed black labor force rose from 6.5 to 13.3 percent; for whites, unemployment rose from 4.3 to 8.0 percent. Racial differences in unemployment are even greater in the female labor force. In 1980 black female unemployment was 13.9 percent; for white females, 7.4 percent.

	Labor Force Status (Persons 16 Yrs. & Over)			Occupation (Percent of Employed Persons 16 Years and Over)						Class of Worker (Percent of Employed Persons 16 Years and Over)			
	In Labor Force	Not In Labor Force	Percent In Labor Force	Managerial & Professional	Tech., Sales, Admin. Support	Service	Farm, Fish, Forestry	Precision Prod., Craft & Repair	Operators, Fabricators, & Laborers	Private Wage & Salary	Government	Self-Employed	Unpaid Family

THE KENTUCKY PROFILES

HOW THE DATA ARE PRESENTED

On the following pages, detailed demographic, social and economic data are presented for the state of Kentucky and each of its 120 counties. Forty-four tables of summary statistics, arranged in six columns, are displayed for each geographical area. Each column generally depicts a particular subject area or grouping of subject areas. Column 1: general population characteristics; column 2: family and household characteristics; column 3: labor force characteristics; column 4: transportation, commuting and veteran status; column 5: income and poverty status; and column 6: education and language.

The detailed list of tables follows:

LIST OF TABLES

Column 1

1. Persons (Total, Urban/Rural, Farm/Nonfarm, Unweighted Sample Count)
2. Persons by Race
3. Persons by Sex and Race
4. Persons by Race, Sex and Age
5. Persons by Ancestry
6. Persons by Nativity and Place of Birth

Column 2

7. Families (Total Count)
8. Persons 15 years and over by Sex and Marital Status
9. Females 15 to 44 years by Age, Marital Status and Mean Number of Children Ever Born
10. Households by Number of Persons in Households
11. Persons by Household Type and Relationship within Household
12. Persons in Group Quarters by Type of Group Quarters
13. Family Households by Presence of Own Children, Race of Householder, and Family Type
14. Nonfamily Household by Race of Householder
15. Person 5 years and over by Residence in 1975

Column 3

16. Persons 16 years and over by Sex, Race and Labor Force Status
17. Females 16 years and over with one or more own Children Present by Age of Children and Labor Force Status
18. Noninstitutional Persons 16 to 64 years by Work Disability Status
19. Employed Persons 16 years and over by Class of Worker
20. Employed Persons 16 years and over by Occupation
21. Employed Persons 16 years and over by Industry

Column 4

22. Workers 16 years and over by Place of Work (State/County Level)
23. Workers 16 years and over by Means of Transportation to Work
24. Workers 16 years and over Who Did Not Work at Home by Travel Time to Work
25. Workers 16 years and over Who Travelled to Work by Car, Truck, or Van by Number of Persons in Vehicle
26. Households by Number of Vehicles Available

AREA CLASSIFICATIONS

URBAN AND RURAL RESIDENCE

As defined for the 1980 census, the urban population comprises all persons living in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas. More specifically, the urban population consists of all persons living in (1) places of 2,500 or more inhabitants incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the New England States, New York, and Wisconsin), but excluding those persons living in the rural portions of extended cities; (2) census designated places of 2,500 or more inhabitants; and (3) other territory, incorporated or unincorporated, included in urbanized areas. The population not classified as urban constitutes the rural population.

The rural farm population includes all persons living in rural areas on farms. Farms are defined as places from which sales of crops, livestock, and other farm products amounted to $1,000 or more during 1979.

URBANIZED AREAS

The major objective of the Census Bureau in delineating urbanized areas is to provide a better separation of urban and rural population and housing in the vicinity of large cities. An urbanized area consists of a central city or cities, and surrounding closely settled contiguous territory ("urban fringe") that together have a minimum population of 50,000.

SUBJECT CHARACTERISTICS

Household-A household includes all the persons who occupy a housing unit. The measure "persons per household" is obtained by dividing the number of persons in households by the number of households (or householders). For further information, see the housing unit definition.

Relationship to Householder-The data on relationship to householder were derived from answers to question 2, which was asked of all persons in housing units. Four basic categories of relationship are recognized in this report.

Householder-One person in each household is designated as the "householder." In most cases, this is the person, or one of the persons, in whose name the home is owned or rented and who is listed in column 1 of the census questionnaire. If there is no such person in the household, any adult household member could be designated as the "householder."

Two types of householders are distinguished: a family householder and a nonfamily householder. A family householder is a householder living with one or more persons related to him or her by birth, marriage, or adoption. The householder and all persons in the household related to him or her are family members. A nonfamily householder is a householder living alone or with nonrelatives only.

Spouse-A person married to and living with a householder. This category includes persons in formal marriages as well as persons in common-law marriages. The number of spouses is equal to the number of "married-couple families."

Child-A son, daughter, stepchild, or adopted child of the householder regardless of the child's age or marital status. The category excludes sons-in-law and daughters-in-law. In this report, those classified as "own child of householder" are sons and daughters, including stepchildren and adopted children, of the householder who are single (never married) and under 18 years of age. "Related" children in a family include own children and all other persons under 18 years of age in the household, regardless of marital status, who are related to the householder by birth, marriage, or adoption.

Other relative-Any person related to the householder by birth, marriage, or adoption, who is not shown separately in the particular table (e.g., "spouse," "child," "brother or sister," or "parent").

Nonrelative-Any person in the household not related to the householder by birth, marriage, or adoption. Roomers, boarders, partners, roommates, paid employees, wards, and foster children are included in this category.

Unrelated Individual-An unrelated individual may be (1) a householder living alone or with nonrelatives only, (2) a household member who is not related to the householder, or (3) a person living in group quarters who is not an inmate of an institution.

Family-A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption; all persons in a household who are related to the householder are regarded as members of his or her family. A "married-couple family" is a family in which the householder and spouse are enumerated as members of the same household. Not all households contain families, because a household may be composed of a group of unrelated persons or one person living alone. The measure "persons per family" is obtained by dividing the number of persons in families by the total number of families (or family householders).

Sex-The data on sex were derived from answers to question 3, which was asked of all persons.

Race-The data on race were derived from answers to question 4, which was asked of all persons. The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-identification, the data represent self-classification by people according to the race with which they identify. In this report, households and families are classified by the race of the householder.

For persons who could not provide a single response to the race question, the race of the person's mother was used; however, if a single response could not be provided for the person's mother, the first race reported by the person was used. This is a modification of the 1970 census procedure in which the race of the person's father was used.

The category "White" includes persons who indicated their race as white, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire, but entered a response such as Canadian, German, Italian, Lebanese, or Polish. In the 1980 census, persons who did not classify themselves in one of the specific race categories but marked "Other" and wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "Other" race category; in the 1970 census, most of these persons were included in the "White" category.

The category "Black" includes persons who indicated their race as Black or Negro, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire, but reported entries such as Jamaican, Black Puerto Rican, West Indian, Haitian, or Nigerian.

"Asian and Pacific Islander" includes persons who indicated their race as Japanese, Chinese, Filipino, Korean, Vietnamese, Asian Indian, Hawaiian, Guamanian, Samoan, and persons who did not classify themselves in one of the specific race categories but marked the "Other" category of the race item and wrote in an Asian and Pacific Islander group such as Laotian, Pakistani, or Fiji Islander. Also, persons who did not classify themselves in one of the specific race categories but wrote in an entry indicating one of the nine specific categories listed above were classified accordingly. For example, entries of Nipponese and Japanese, entries of Taiwanese and Cantonese as Chinese, etc.

Age-The data on age were derived from answers to question 5, which was asked of all persons. Only the information in questions 5b and 5c (on month and year of birth) was read into the computer. Answers to question 5a (on page at last birthday) were used during field review to fill in any blanks in questions 5b and 5c. The age classification is based on the age of the person in completed years as of April 1, 1980. The data on age represent the difference, as calculated in the computer, between date of birth and April 1, 1980. The median ages shown in this report are computed on the basis of more detailed intervals than shown herein.

Marital Status-The data on marital status were derived from question 6, which was asked of all persons.

The marital status classification refers to the status at the time of enumeration. Persons classified as "now married" only once and have never been widowed or divorced and those currently married persons who remarried after having been widowed or divorced. Persons reported as separated are those living apart because of marital discord, with or without a legal separation. Persons in common-law marriages are classified as married, persons whose only marriage had been annulled are classified as never married, and all persons under 15 years old are classified as never married. All persons classified as never married are shown as "single" in this report.

Spanish Origin-The data on Spanish/Hispanic origin or descent were derived from answers to question 7, which was asked of all persons. Persons of Spanish origin or descent are those who classified themselves in one of the specific Spanish origin categories listed on the questionnaire-Mexican, Puerto Rican, or Cuban-as well as those who indicated that they were of other Spanish/Hispanic origin. Persons reporting "other Spanish/ Hispanic" orgin are those whose origins are from Spain or the Spanish-speaking countries of Central or South America, or they are Spanish origin persons identifying themselves generally as Spanish, Spanish American, Hispano, Latino, etc. Origin or descent can be viewed as the ancestry, nationality group, lineage, or country in which the person or person's parents or ancestors were born before their arrival in the United States. Persons of Spanish origin may be of any race. In this report, as to how to report a specific origin were classified according to the origin of the person's mother. If.a single origin was not provided for the person's mother, the first reported origin of the person was used.

Preliminary evaluations of 1980 census data suggest some limited misreporting of Spanish origin. Available evidence indicates that the misreporting may have occurred only in selected areas with relatively small Spanish origin populations, such as in some southern States, but it is not apparent in those areas with the largest concentrations of Spanish origin persons. For a fuller discussion of the reporting in the Spanish origin item, see the 1980 census supplementary report, "Persons of Spanish Origin by States: 1980."

School Enrollment-The data on school enrollment were derived from answers to questions 8 and 9. Persons are included as enrolled in school if they reported attending a "regular" school or college at any time between February 1, 1980, and the time of enumeration. Regular schooling is defined as nursery school, kindergarten, elementary school, and schooling which leads to a high school diploma or college degree. Schooling in trade or business schools, company training, or schooling through a tutor was to be reported only if the course credits obtained were regarded as transferable to a regular elementary school, high school, or college. Persons were to be reported as enrolled in nursery school if the school included instruction as an integral phase of its program but not if only custodial care was given. Children in Head Start programs were to be reported in nursery school or kindergarten as appropriate.

Elementary school, as defined here, includes grades 1 through 8, and high school includes grades 9 through 12. In general, a public school is defined as any school which is controlled and supported primarily by a local, State, or Federal government agency.

Years of School Completed-The data on years of school completed were derived from answers to questions 9 and 10. Persons whose education was received in a foreign school system or an ungraded school were instructed to report the approximate equivalent grade in the regular American school system. If a person were currently attending or did not finish (question 10) the highest grade attended (question 9), he or she was tabulated as having completed the previous grade or year.

If the person did not attend college but finished high school by an equivalency test (GED), the person was instructed to mark grade 12 (high school, 4 years).

Nativity and Place of Birth-The data on nativity and place of birth were derived from answers to questions 11 and 12. The category "native" comprises persons born in the United States, in the Commonwealth of Puerto Rico, or in an outlying area of the United States. Also included in this category is the small number of persons who were born abroad of American parents. Persons not classified as native are classified as foreign born.

Native persons are classified according to their State or area of birth. Respondents were instructed to report place of birth as the mother's usual State of residence at the time of the birth, rather than as the location of the hospital if the birth occurred in a hospital.

Language Spoken at Home and Ability to Speak English-The data on language spoken at home and ability to speak English were derived from answers to questions 13a, b, and c. Persons who responded in question 13a that they spoke a language other than English at home were asked to report what language they spoke (question 13b) and how well they could speak English (question 13c). All languages that were reported were coded using a detailed classification of languages. Ability to speak English was reported as one of four categories: "Very well," "Well," "Not well," or "Not at all."

The questions on language usage were intended to determine the extent to which non-English languages are spoken in the United States and to determine how many persons feel they have difficulty speaking English. The questions were not intended to determine which language was a person's main language, or whether a person was fluent in the non-English language that he or she reported. Therefore, it cannot be assumed that those persons who reported speaking a language other than English did not speak English at home, or that they were more fluent in the non-English language than in English.

Veteran Status-The data on veteran status were derived from responses to question 18. A "veteran," as defined in census publications, is a person 16 years old or over who has served but is not now serving on active duty in the Armed Forces of the United States. Persons are classified as veterans if they were ever on active duty in the U. S. Army, Navy, Air Force, Marine Corps, or Coast Guard, even if the time served was short. Persons in the National Guard or in military reserve units are classified as veterans only if they were ever called to active duty. All other civilians 16 years old and over are classified as nonveterans.

Work Disability-The data on disability status were derived from answers to question 19. Persons are identified as having a work disability if they had a health condition which had lasted 6 or more months and which limited the kind or amount of work they could do at a job. Persons with a work disability are further classified as "prevented from working" or "not prevented from working."

The term "health condition" refers to both physical and mental conditions. Temporary health problems are not considered a health condition.

Persons are considered limited in the kind or amount of work they could do if they were restricted in the kinds of jobs at which they were able to work or if they were unable to work at a full-time job.

Public Transportation Disability-Persons are identified as having a public transportation disability if they had a health condition which had lasted 6 or more months and which made it difficult or impossible for them to use buses, trains, subways, or other forms of public transportation.

Fertility (Children Ever Born)-The data on children ever born were derived from responses to question 20. The number of children ever born to a woman consists of all live births the woman has ever had, including any babies who have died (even shortly after birth) or who no longer live with her. Excluded are miscarriages and stillbirths, and any of the woman's stepchildren, foster children, or adopted children.

Means of Transportation to Work-The data on means of transportation to work were derived from answers to questions 24b, 24c, and 24d which were asked only of persons who indicated in question 22 that they had worked at any time during the reference week (see below for definition of reference week). Means of transportation to work refers to the principal mode of travel or type of conveyance that the person usually used to get from home to work during the reference week. Persons who used different means of transportation on different days of the week were asked to specify the one they used most often. Persons who used more than one means of transportation to get to work each day were asked to report the one used for the longest distance during the work trip. The category "car, truck, or van" includes workers using a car (including company cars but excluding taxicabs), a truck of one-ton capacity or less, or a van. The category "public transportation" includes workers who used a bus or streetcar, subway or elevated, railroad, or taxicab.

A question on carpooling (question 24c) was asked of all workers who reported their means of transportation to work as "car," "truck," or "van." The category "drive alone" includes persons who usually drove alone to work, as well as persons who were driven to work by someone who then drove back home or to a nonwork destination. The category "carpool" includes workers who reported that they usually shared driving, drove others, or rode as a passenger during the reference week. The measure "persons per private vehicle" is obtained by dividing the number of persons using a car, truck, or van to get to work by the number of such vehicles that they used.

Reference Week-The data on labor force status and journey to work relate to the calendar week preceding the date on which the respondents completed their questionnaires or were interviewed by enumerators. This week is not the same for all respondents because not all persons were enumerated during the same week.

Labor Force Status-The data on labor force status were derived from answers to questions 22, 25, and 26. The "labor force" includes all persons in the civilian labor force plus members of the Armed Forces (persons 16 years old and over on active duty with the U. S. Army, Navy, Air Force, Marine Corps, or Coast Guard). The "civilian labor force" consists of persons classified as employed or unemployed in accordance with the criteria described below.

All persons 16 years old and over who are not classified as members of the labor force are defined as "not in labor force." This category consists mainly of students, housewives, retired workers, seasonal workers enumerated in an "off" season who were not looking for work, inmates of institutions, disabled persons, and persons doing only unpaid family work (less than 15 hours during the reference week).

Employed-Employed persons include all civilians 16 years old and over who were either (a) "at work"-those who did any work at all during the reference week as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business; or (b) were "with a job but not at work"-those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other persons reasons. Excluded from the employed are persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations.

Unemployed-Persons are classified as unemployed if they were civilians 16 years old and over and (a) were neither "at work" nor with a job but not at work" during the reference week, (b) were looking for work during the last 4 weeks, and (c) were available to accept a job. Also included as unemployed are persons who did not work at all during the reference week and were waiting to be called back to a job from which they had been laid off.

Industry and Occupation-The data on industry and occupation were derived from answers to questions 28 and 29, respectively, and are shown here for employed persons 16 years old and over. For persons who worked at two or more jobs, the data refer to the job at which the person worked the greatest number of hours. The industry and occupation statistics are based on the detailed classification systems developed for the 1980 census. The 1980 industry classification is based on the U. S. Standard Industrial Classification (SIC) and is similar to the 1970 system; the 1980 occupation classification is based on the new U. S. Standard Occupation Classification (SOC). This report shows major occupation and industry groups. The relationship between these major groups and more detailed categories found in other reports will be shown in the PC80-1-C reports and PC80-1-D microfiche.

Class of Worker-The data on class of worker were derived from answers to question 30. The information on class of worker refers to the same job as a respondent's industry and occupation. The definitions of the class of worker categories shown in this report are as follows:

Private wage and salary workers-Persons who work for a private employer for wages, salary, commission, tips, pay-in-kind, or at piece rates.

Government workers-Employees of any Federal, State, or local governmental unit, regardless of the activity of the particular agency.

Self-employed workers-Those who work for profit or fees in their own unincorporated business, profession, or trade or who operate a farm.

Unpaid family workers-Those who work without pay in a family business or farm.

Labor Force Status In 1979-The data on labor status in 1979 were derived from answers to question 31. Persons 16 years old and over are classified as "in labor force in 1979" if they worked in 1979 or had any weeks of unemployment in 1979, in accordance with the criteria for weeks worked in 1979 and weeks of unemployment in 1979 described below.

Worked in 1979-Persons 16 years old and over who worked 1 or more weeks in 1979 in accordance with the criteria described below are classified as "worked in 1979." The data on weeks worked in 1979 pertain to the number of weeks during 1979 in which persons 16 years old and over did any work for pay or profit (including weeks on paid vacation or on paid sick leave) or worked without pay on a family farm or in a family business, or were on active duty in the Armed Forces.

Persons 16 years old and over who reported that they usually worked 35 or more hours each week during the weeks they worked are classified as "usually worked full-time," persons who reported that they usually worked 1 to 34 hours are classified as "usually worked part-time."

With Unemployment in 1979-Persons 16 years old and over who had one or more weeks of unemployment in 1979 in accordance with the criteria described below are classified as "with unemployment in 1979."

Weeks of Unemployment in 1979-The data on weeks of unemployment in 1979 pertain to the number of weeks during 1979 in which persons 16 years old and over did not work but spent any time looking for work (i.e., trying to get a job or start a business or professional practice) or on layoff from a job. Excluded are any weeks in which the person worked, even for one hour; or any weeks for which the person received any wages or salary; or in which the person was on active duty in the Armed Forces, on paid vacation, or on paid leave.

Income in 1979-The data on income in 1979 were derived from answers to questions 32 and 33. Information on money income received in the calendar year 1979 was requested from persons 15 years old and over. "Total income" is the algebraic sum of the amounts reported separately for wage and salary income; nonfarm net self-employment income; farm net self-employment income; interest, dividend, royalty or net rental income; Social Security or Railroad

Retirement income; public assistance or welfare income; and all other income. The figures represent the amount of income received regularly before deductions for personal income taxes, Social Security, bond purchases, union dues, medicare deductions, etc.

"Wage or salary income" is defined as the total money earnings, received for work performed as an employee at any time during the calendar year 1979. It includes wages, salary, pay from Armed Forces, commissions, tips, piece rate payments, and cash bonuses earned. "Nonfarm net self-employment income" is defined as net money income (gross receipts minus business expenses) received from a business, professional enterprise, or partnership in which the person was engaged on his or her own account. "Farm net self-employment income" is defined as the net money income (gross receipts minus operating expenses) received from the operation of a farm by a person on his or her own account, as an owner, renter, or sharecropper. "Earnings" is defined as the algebraic sum of wage or salary income and net income from farm and nonfarm self-employment. "Interest, dividend, royalty or net rental income" includes interest on savings or bonds, dividends from stockholdings or membership in associations, net royalties, and net income from rental of property to others and receipts from boarders or ladgers. "Social Security income" includes Social Security pensions and survivors' benefits and permanent disability insurance payments made by the Social Security Administration, prior to deductions for medical insurance, and railroad retirement insurance checks from the U. S. Government. "Medicare" reimbursements are not included. "Public assistance" or public welfare income includes (1) supplementary security income payments made by Federal, State, or local welfare agencies to low income persons who are aged (65 years old or over), blind, or disabled; (2) aid to families with dependent children, and (3) general assistance. Separate payments received for hospital or other medical care (vendor payments) are excluded from this item. "Income from all other sources" includes unemployment compensation, veterans' payments, public or private pensions, alimony or child support, workmen's compensation, periodic payments from estates and trust funds, periodic receipts from annuities or insurance, contributions received periodically from persons not living in the household, military family allotments, net gambling winnings and other kinds of periodic income other than earnings.

Receipts from the following sources were not included as income: money received from the sale of property (unless the recipient was engaged in the business of selling such property); the value of income "in kind" from food stamps, public housing subsidies, medical care, employees' contributions for pensions, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Although the income statistics cover the calendar year 1979, the characteristics of persons and the composition of households and families refer to the time of enumeration (April 1, 1980). For most households and families, however, the income reported was received by persons who were members of the household or family through 1979.

The median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. For households, families, and unrelated individuals, the median income is based on the distribution of the total number of units including those with no income. The median income values for all households, families, and unrelated individuals are computed on the basis of more detailed income intervals than shown in tables 4 and 5. Median income figures of $30,000 or less in table 4 and table 5 are generally calculated using linear interpolation; all other median income amounts are derived through Pareto interpolation. For a detailed description of these interpolation procedures, see appendix B to the Current Population Reports, Series P-60, No. 126.

The mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households. For the various types of income, the means are based on households having those types of income.

Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Care should be exercised in using and interpreting mean or per capita values in the statistics for small areas or small subgroups of the population. Since the mean and per capita income amounts are strongly influenced by extreme values in the distribution, they are especially susceptible to the effects of sampling variability, misreporting, and processing errors. The median, which is not affected by extreme values, is therefore a better measure than the mean or per capita when the population base is small.

Poverty Status in 1979-Families and unrelated individuals are classified as being below or above the poverty level, based on income in 1979 using a poverty index which provides a range of income cutoffs or "poverty thresholds" varying by size of family, number of children, and age of the family householder or unrelated individual. The poverty thresholds used in the 1980 census differ slightly from those used in the 1970 census, which took into account the same three factors as well as sex of the family householder or unrelated individual and farm-non-farm residence. In addition, for the 1980 census the thresholds by size of family were extended from 7 or more persons to 9 or more persons. The income cutoffs are updated each year to reflect the change in the Consumer Price Index. The poverty threshold for a family of four was $7,412 in 1979; thresholds by size of family are shown below. Inmates of institutions, members of the Armed Forces living in barracks, college students in dormitories, and unrelated individuals under 15 years are excluded from the poverty universe. For a detailed explanation of the poverty definition, see Current Population Reports, Series P-60, No. 130, "Characteristics of the Population Below the Poverty Level: 1979."

WEIGHTED AVERAGE POVERTY THRESHOLDS FOR 1979

Size of Family	Threshold
1 person:	
Under 65 years	$3,774
65 years and over	3,479
2 persons:	
Householder under 65 years	4,876
Householder 65 years and over	4,389
3 persons	5,787
4 persons	7,412
5 persons	8,776
6 persons	9,915
7 persons	11,237
8 persons	12,484
9 or more persons	14,812

Other Population Reports and Data Available

The Kentucky Demographics Series

Kentucky Demographics is a continuing series of special reports developed by the Population Research Unit of the Urban Studies Center. Reports issued to date, and available at the Urban Studies Center at the prices indicated, deal with the following subjects:

Number 1 Kentucky Demographics: Kentucky and the 1980 Census. June 1980. Out of print; not available.

Number 2 Kentucky Demographics: Migration Patterns of Kentucky's Older Population. November 1980. $1.00 plus 25 cents postage.

Number 3 Kentucky Demographics: Transportation Needs of Kentucky's Older Population. March 1981. No charge; 25 cents postage.

Number 4 Kentucky Demographics: Preliminary Subcounty Population Estimates, 1980-1985. February 1981. Out of print, not available.

Number 5 Kentucky Demographics: Change in the Black Population of Kentucky: 1960-1980. August 1981. $1.00 plus 25 cents postage.

Number 6 Kentucky Demographics: Population Housing, Income and Labor Force in Kentucky: 1970-1980. $1.00 plus 25 cents postage.

Number 7 Kentucky Demographics: The 1980 Census of Kentucky: Characteristics of Population, Households, Housing. Out of print; replaced in new series, The 1980 Census of Kentucky, General Characteristics of Population Households, Housing. See inside front cover.

Number 8 Kentucky Demographics: Social, Economic and Housing Characteristics for Kentucky, 1970-1980. $3.00.

The State Data Center Program

The State Data Center of Kentucky has data available, in printed, microfiche and/or computer tapes, along with maps for geographic analysis of the data. Included are all U.S. Census data for Kentucky at all geographic levels--the state as a whole, Congressional districts, counties, cities, and such subcounty divisions as enumeration districts and, in the designated standard metropolitan areas, census tracts, blocks and block groups.
